

STRAKES HIS GERMANY TO THE LARGE

Budget Will Come Down During Day

Not Expected to Be Larger
Than One For
Last Year

DEFICIT WILL BE
OVER HALF MILLION

Liquor Profits Will Weigh
Out Shortage for Com-
ing Year

The annual budget will be brought down in the Legislature today, according to the announcement made by the Hon. R. C. Reid, Provincial Treasurer, last week. No definite information has been given out as to what amount will be asked for in the estimates, but it is not expected that the total will be much higher than last year, if any. There is just a possibility that there will be a slight reduction.

The total expenditure for 1923 according to the public accounts which were tabled in the house about two weeks ago, amounted to \$18,914,142. The total revenue introduced was \$17,613,425 leaving a deficit of \$1,300,717. This deficit is considerably less than was expected when the estimates were passed in the house last spring. The fact that the actual deficit was less than was estimated that the total deficit would probably be \$1,500,000.

The difference between the estimated and the actual deficit is accounted for by the fact that surplus liquor profits amounting to \$445,000 was capitalized and this amount was turned into the general revenue fund. Had it not been for the fact that this additional amount was turned into the general revenue fund, the actual deficit would have been very close to the estimated deficit.

It may be no shortage, but rather that there will be a small surplus. This however is contingent upon the estimates being for the same amount as last year. As a result of the sale of liquor under government control, it is estimated that the revenue will be increased by approximately \$1,000,000 for this year. This estimate has been based on the profits that have been made in British Columbia and Mani-

The liquor profits last year under the system amounted to \$1,724,841. If the profits for this year are anywhere near the estimate, the total revenue of the province should be well over \$1,000,000 instead of \$1,019,146, and if the liquor profits are as high as for 1924 there should at least be a small surplus.

**EDMONTON DOCTOR
RETURNS TO CANADA**

Harold Orr Has Completed
Studies in England
and Vienna

(Special to The Bulletin)
Dr. JOHN N. R. March 16.—After spending fifteen months at the University of London and in the clinical department of London Hospital, Dr. Harold Orr, of this city, has returned to Canada, arriving here yesterday on the Canadian Pacific. Dr. Orr spent a month in Vienna where he made a careful study of the methods used at the various clinics. He was accompanied by his wife and young daughter; they left for their home in the morning and from there will proceed to their home in the morning.

Dr. H. Mann, a trustee of the Lethbridge Northern Irrigation and Reclamation Company who went to Europe as a special representative of the company, has returned to the province. He brought with him a number of valuable specimens of the various plants and animals of the various countries. He is accompanied by his wife and young daughter; they left for their home in the morning and from there will proceed to their home in the morning.

GIVEN HIGH HONOR

BENITO MUSSOLINI

ROME, March 16.—King Victor Emmanuel has conferred the Order of the Annunziata on Premier Mussolini, according to an announcement in the official gazette today. This is the highest rank of knighthood in Italy. The wearer of the order is considered counts of the king.

**EXPRESS RATE
CHARGE TOLD**

Continual Increase of In-
come Each Year Shown
in Report

OTTAWA, March 16.—(Canadian Press)—Argument probably will be closed on Wednesday by the application of various municipalities for reduced express rates in Canada. The hearing already has lasted into the night and is expected to continue on both sides before the Canadian Railway commission.

The principal charge was made by the government of Saskatchewan. Mr. McDonald submitted figures for the various periods, 1909-1912, showing an increase in express revenue to the Canadian Pacific railway from 1912 to 1921, compared with 1912, the revenue from express increased 12 per cent.

The witness gave track mileage and per passenger car mileage figures from 1909 to 1921 showing a larger percentage increase in express revenue than in revenue from passengers. An analysis of the passenger rail revenue and operating expenses for 1922 showed that it cost the passenger department of the Canadian Pacific railway and its express department approximately \$1,000,000 more to carry a dollar's worth of express than it cost to carry a dollar's worth of passengers.

Mr. McDonald said that the contract between the Canadian Pacific railway and its express department appears to be the most unique of any express company in the world. The express department is charged with the transportation of express material and the passenger department is charged with the transportation of passengers. The express department is charged with the transportation of express material and the passenger department is charged with the transportation of passengers.

WORKERS TO RESUME
WAGES CONFERENCE

Profit - Sharing Pay Plan
Proves Unsuccessful,
Say Employers

LONDON, March 16.—(United Press)—A bold effort to avert the threatened coal strike in Britain, Premier MacDonald has decided to state the case of his government on the miners' minimum wages bill, which is to be drafted immediately and introduced in April, a government measure.

This decision, reached in the week-end conference, is probably the most important one taken by the new cabinet, as far as questions of policy are concerned. If the bill fails, it appears certain that about 700,000 coal miners will strike on April 17.

The minimum wages measure which the government has decided to support gives the miners the 1914 standard for wages with an increase of seven-and-a-half per cent to compensate for the increased cost of living during the past ten years.

The measure is a feeling among the miners that the government has decided to support the miners' demand for a 1914 standard for wages with an increase of seven-and-a-half per cent to compensate for the increased cost of living during the past ten years.

DETAILS REMAIN TO BE DECIDED BEFORE GERMANY RULING

Resources of Nation Placed in Control of Central Bank;
France to Relinquish Control of Mines;
Troops to Remain

ALL SURPLUS REVENUE
TO GO INTO REPARATIONS

Allies to Divide Control of Insurance with Enemies—
Money to Be Deposited in Neutral Country—
Payments Guaranteed

PARIS, March 16.—The report of the first committee of experts, under Brigadier-General Charles G. Dawes, which is practically agreed upon by the experts, although the working out of some details and the drawing up of the text may require another week, is based on three fundamental principles.

The German people must pay as much in taxes as any of the people of the allied countries. Germany must pay the maximum of her capacity in reparations. The German economic machine must be free to function under German control, unimpeded by interference from the outside.

Minimum sums must be paid at once, or in the immediate future, on reparations, these to be increased in proportion to the revival of Germany's prosperity and according to her economic condition.

In order to carry out Germany in a position to carry out her part of the program, which the report will suggest to the reparations commission, the experts propose to set up an international bank, to have exclusive rights to the issue of German currency on a gold basis. The bank will provide for the co-operation of the allied and neutral nations with the German in supplying capital, and in the management of the institution, which is to be located in some neutral country in the last year.

Capital Voted
The capital of the bank remains to be fixed. Indications are that it will be in the neighborhood of \$400,000,000. The bank will be managed by a committee of the allied and neutral nations, with the German and the remainder from abroad. Foreign subscribers to the bank will be required to pay in instalments. The bank will be managed by a committee of the allied and neutral nations, with the German and the remainder from abroad.

Two Years Old
The two years old of the members of the bank will be composed of a majority of the allied and neutral nations, with the German and the remainder from abroad. The bank will be managed by a committee of the allied and neutral nations, with the German and the remainder from abroad.

A. E. Ottewell Speaks on Western Conditions at Sunday Service at U.

"A Stranger Within the Gates" was the subject of a very interesting address given by A. E. Ottewill, M. A., of the Department of Extension of the University of Toronto, at the Convocation Hall yesterday morning. Mr. Ottewill addressed a large and representative group of our alien population, brought in under the Dominions Immigration Act, and the Special Residents of Western Canada.

Hostility Is Ancient

"Of the 'strangers' that we are to consider within our midst," said the speaker in opening his address, "I am going to speak of the 'strangers' of the human race. The obligations of Canadians in this regard are not new. The 'strangers' of the past are the custodians of the largest block of unoccupied and highly fertile land in the western hemisphere today. We are also the heirs of a long time of Allied the Great, over 1,600 years ago—that, or developing, of the alien population. The level of individual development to the greatest extent possible without loss of the individuality of the people as a whole.

That this open door policy had been taken advantage of, the speaker proved by the statement that for a few years preceding the war, alien immigrants were pouring into Can-

ada, at the rate of 1,000 per day. Some idea of the problem of assimilation can be gained by considering that, with very few exceptions, none of these people knew anything of our language or customs. It was a task to be faced for all of them. Immigrants were coming to Canada for a period of years preceding the war, all ships and the army were demobilized after the war, and the tremendous problem of re-instating these returned men—ninth of them were two people—is familiar to everyone.

As a result of the war, until last year this immigration of aliens was in fact the largest in the history of the tide has started to flow in again. Within the last forty-eight hours, 2,500 people from Southeastern Europe have arrived in Canada. No one seems to have known that they were coming until they arrived. This is probably the first wave of a great

Dual Nationality Problem

"Only fifty-five per cent of the present population of Canada are of British origin. And in this number must be included those of the United States who have come from the United States," continued the speaker. "Canada has a dual nationality problem, with twenty-eight per cent of her people of French origin. 'The status of the other 17 per cent are people of all nationalities.'"

"Alberta alone has forty-seven nationalities represented. We in western Canada have a more intensive problem on our hands than the people in the east. The 17 per cent of the population of the province today is non-British, twenty-

Two per cent of the people of Edmonton, and sixteen per cent of the people of Calgary, are of alien stock."

These people, Mr. Ottenwell said, may be found in the west in communities of various kinds. Some of them tend to congregate in colonies, such as the Southbors and Menounites. Many of such colonies are to be found throughout the province, but the largest are in the cities. Working men cluster in mining towns, where they form the major part of the population, are reproducing fast, and producing slum conditions, due to the lack of housing, where such conditions are not at all necessary. Thirdly, we have districts in which a process of infiltration has produced a mixture of races, and in which the alien is common, and who refuse to work together. This condition is the most difficult to deal with.

In the **United States of America**, the same is said to be true. In the United States, the children of the educated British people, and put in the hands of the American people, and of whom are removed only a few and a few are removed from the American people according to the American people's political leaders.

In the United States, the children of the educated British people, and put in the hands of the American people, and of whom are removed only a few and a few are removed from the American people according to the American people's political leaders.

Help Make Canadians.

In conclusion, Mr. Ottewill appealed to the students of the University to meet these problems squarely, and to do their part in the great work of making new Canadians of an unflinching source of material, which is in many respects highly desirable, if difficult to handle. He thought this could be done. He recounted the experience of some of the graduates he has met on his travels throughout the province on the business of the department.

The services were conducted by his Hon. L. E. Cameron, with Mr. Harwood as speaker.

Magistrate Primrose Fines Bodnar But Declares He "Hates to Do It"

"He has just been robbing the machine," declared Magistrate Primrose, as he sentenced a man to the police cell for 14 days, "and it is robbing away my sleep."

Magistrate had pleaded guilty to a charge of theft by the use of the ice more than a dozen times, and he had been in the lead sled, postal checks and a small box of tools, which he carried with him for the purpose of robbing their for in a Jasper area. He had been arrested on another ship, displayed by Inspector Bodnar, who had entered an appeal under the case proceeded.

"This is his first occasion for being in jail," the magistrate remarked. "He has always been a good fellow, and he has been at Spirit River to which he has been sent."

An addition will be made to the muskqueto field of the Great Slave Lake this spring in the shape of a new motor boat, which is being built by the Northern Boat Building Company here for the use of Dr. Bourget. The boat will be used for the purpose of making expeditions of Indian Affairs at Fort Resolution.

The new affair is being designed to stand up to any weather which the north wind might supply, and this in general respect that construction by deep sea traffic, sudden, and it is a boat that can be picked up and that would be considered as a boat that could be used either the Atlantic or Pacific, and the boat will be built for the northern water must be staunch.

Dr. Doucet's boat is 25 feet long, decked in with a rummy cabin and has a small engine. It is loaded with all the necessities. She is being equipped with a 24-36 Miller international engine, which will run on both steady and seaway.

In the hope of treating to the various people who are to be taken on shore of the Great Lakes, Doucet is making long trips while away. It has to travel to the various camps and to the various villages of the sailors' wards. Previously he has had to special vessel for this work, but now he will be able to make of the regular trading vessels and can

the mortgage bonds, would be distributed among the allies on the percentage fixed in the agreement. The mortgage bonds at six per cent the experts here recommended, at one per cent as the Germans demanded or five and a half per cent as a compromise. It is hoped that the mortgage payments on these mortgage bonds would make them negotiable, enabling France, for instance, to realize something on them and save her financial straits.

Junk Car Wins Race; Kind of Girl to Marry; Latest in Vocations

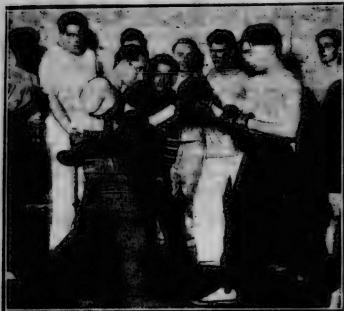

Miss Daphney Fields, deb. daughter of the millionaire Stanley Fields of Chicago, has startled the society world by entering business as an honest-to-goodness, clock-punching salesgirl, in one of the city's largest stores

Harlan Fengler, young auto racer, won the 250-mile speed classic at the Beverly Hills race course in California, recently. The winning car was once disposed of as junk until picked up by Fengler

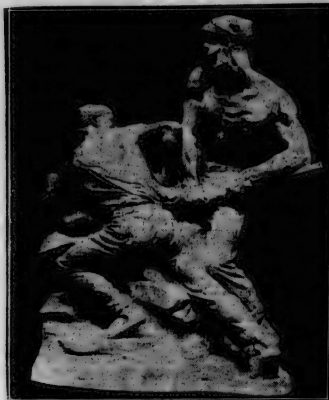

Miss Helena Kiefer, of Columbus, Ohio, charming society debutante, has just celebrated her fifth birthday. Miss Kiefer is vice-president of the Leap Year Club comprised of those people whose birthday falls on February 29

Royal S. Copeland, Jr., son of the New York senator and writer, is here seen with his coach, showing his mates how to handle the gloves. He is a member of a class where instruction is received on how to keep fit

As shown by this miss at Deauville, the old style kerchief is rapidly gaining lost prestige. With a dress of corresponding colors, overlaid by a network, it makes a charming spring combination

The subject for the final competition for the Rome scholarship in sculpture for 1923 was a group of two figures symbolical of labor. David Evans, of Manchester, England, was the winner with the above work

Mrs. Thyra Samter Winslow, short story writer, of New York, has embarked on "a year's vacation from marriage." Meantime her husband, John Semour Winslow, is maintaining his "Bachelor's hall" in another part of city.

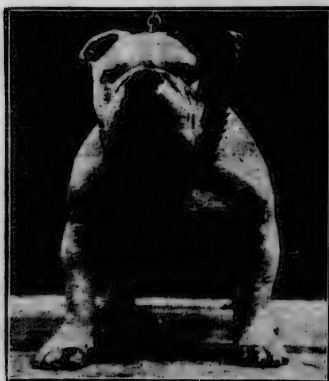

No, there has been no swimming at the beaches in Toronto so far this year, but there are thousands of youngsters in the city who are anxiously waiting for the warm weather and bathing-suit season to come again

The University of Pennsylvania, Philadelphia, Pa., Varsity crew, on its first water performance of the season more than convinced Coach Joe Wright that he had a group of boys that will go far this season in water meets

Here are some fine, sturdy Britishers, who have recently arrived in Canada from the Motherland. They were photographed at St. John, N.B., before boarding the train for various parts of the dominion

This champion bulldog, "Caulfield Monarch", was among the prize winners at a dog show held in London, England, recently

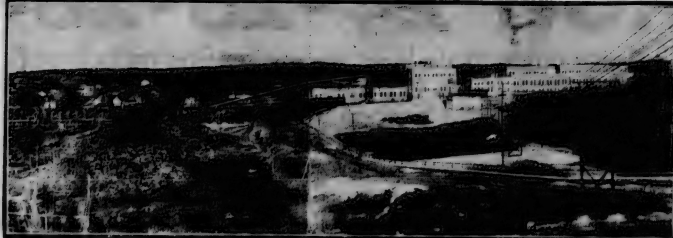

Photograph shows some of the great damage caused at Nixon, New Jersey, when a quantity of ammonite exploded. Eighteen people were killed, two are missing and a large area was laid bare

Rev. H. R. Griffin, of New York, adopted for his text recently, "What Kind of a Girl to Marry?" and, to emphasize his sermon, five young girls, of various types, were exhibited in the pulpit

Golf players in England are shown returning to their clubhouse after abandoning their match. They found a snowstorm interested considerably with their play

Here is one of the many pulp mills in Canada where newsprint is made. Photograph shows the Backus and Brooks plant at Kenora, Ontario, showing a huge pile of spruce logs which are conveyed mechanically to the grinder room

Photograph shows the three Duncan sisters—Anna, Lisa and Margo, classic dancers, who have just returned to this country after three years of triumphant appearance in France, Belgium and Algeria. They are to appear in Toronto this month
